

David Scales

Computer Science Graduate

19 Hazelmere Road, Stevenage, SG2 8RX, 07539 790177, davidscales7@gmail.com

Professional summary

Detailed-oriented and disciplined Computer Science graduate with diverse experience across multiple service industries. Seeking to leverage technical skills and robust problem-solving abilities in a software development role. Highly adaptable, with a proven track record of learning new skills rapidly and managing responsibilities in high-pressure environments. In my time at university and in the period afterwards, I have made personal projects to progress my programming abilities. Instances of these are a Finance tracker along with a working database to keep individuals' personal data and a front-end application to purchase medicine and schedule appointments with doctors at a Pharmacist. Currently I am making a language learning app this is using React and MongoDB. I have also worked on data analysis projects and used machine learning on data sets in order to predict future outcomes.
